

## Product datasheet for TA336400

### Livin (BIRC7) Mouse Monoclonal Antibody [Clone ID: 88C570]

#### Product data:

Product Type:	Primary Antibodies
Clone Name:	88C570
Applications:	WB
Recommend Dilution:	WB: 1-2 ug/ml, IF: 2-5 ug/ml
Reactivity:	Human
Host:	Mouse
Isotype:	IgG1, kappa
Clonality:	Monoclonal
Immunogen:	Recombinant human livin protein was used as immunogen.
Formulation:	PBS containing 0.05% BSA, 0.05% Sodium Azide. Store at 4C short term. Aliquot and store at -20C long term. Avoid freeze-thaw cycles.
Concentration:	0.5 mg/ml
Purification:	Protein G purified
Gene Name:	baculoviral IAP repeat containing 7
Database Link:	<a href="#">NP_647478 Entrez Gene 79444 Human</a>
Background:	The inhibitor of apoptosis (IAP) family of proteins regulates programmed cell death triggered by various stimuli. All IAPs have at least one baculovirus IAP repeat (BIR) motif that is essential for their anti-apoptotic activity. Recently, Kasof and Gomes (1), Vucic et al. and Ashhab et al. have identified a novel human inhibitor of apoptosis protein (IAP) family member termed Livin or ML-IAP, which contains a single baculoviral IAP repeat (BIR) domain and a COOH-terminal RING finger domain. Livin gene has two splicing variants that contain open reading frames of 298 and 280 amino acids and both contained a single copy of baculovirus IAP repeat (BIR) and RING domain. Both of the isoforms inhibit TNF $\alpha$ induced apoptosis in Jurkat cells. Livin expression is low in adult tissues. It is relatively expressed at a higher level in developmental tissues and in many cancer cells.
Synonyms:	KIAP; LIVIN; ML-IAP; MLIAP; RNF50
Note:	Immunocytochemistry/Immunofluorescence see Nachmias et al, 2007
Protein Families:	Druggable Genome
