HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY SOX17 ([RC220888], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-SOX17. Positive lysates [LY411669] (100ug) and [LC411669] (20ug) can be purchased separately from OriGene.

HEK293T cells transfected with either [RC220888] overexpress plasmid (Red) or empty vector control plasmid (Blue) were immunostained by anti-SOX17 antibody (TA500045), and then analyzed by flow cytometry.
